The Dying Process As a person comes close to death, the dying process begins; a journey from the known life of this world to the unknown of what lies ahead. As this process begins, a person starts on a mental path of discovery, comprehending that death will indeed occur and believing in their own mortality.

~~How to Recognize When Your Loved One Is Dying~~

During the dying process, the body's systems shut down. The dying person has less energy and begins to sleep more and more. The body is conserving the little energy it has, and as a result, needs less nourishment and sustenance. In the days (or sometimes weeks) before death, people eat and drink less.

~~What happens during the dying process? | HowStuffWorks~~

Death is the permanent cessation of all biological functions that sustain a living organism. The remains of a living organism begin to decompose shortly after death. It is an inevitable process eventually occurring in all living organisms. As of the early 21st century, over 150,000 humans die each day.

~~Death - Wikipedia~~

Physiological death occurs when the vital organs no longer function. The digestive and respiratory systems begin to shut down during the gradual process of dying. A dying person no longer wants to eat as digestion slows and the digestive track loses moisture and chewing, swallowing, and elimination become painful processes.

~~Death Process | Hayagriva Buddhist Centre~~

The dying process is a period of time when the body begins to shut down and prepare for death. It's an important period of time for the dying person and their loved ones during which they can express their feelings and show their love. It's a time of preparation for the dying person and their loved ones who must get ready for the inevitable loss.

~~6 Steps for Recognizing and Coping With Dying~~

There's no circulation, and no new reserves of oxygen are reaching cells. However, clinical death also denotes that this is a point where the process is reversible, by means of CPR, a transfusion or a ventilator. The point of no return is biological death, which begins about four to six minutes after clinical death.
