A Brief History of the Landsat Program. In the mid-1960 ' s, the National Aeronautics and Space Administration (NASA) embarked on an initiative to develop and launch the first Earth- monitoring satellite to meet the needs of resource managers and earth scientists. The U.S. Geological Survey (USGS) entered into a partnership with NASA in the early 1970 ' s to assume responsibility for archiving data and distributing data products.

Landsat Data - A Brief History of the Landsat Program

From the Beginning. “ The Landsat program was created in the United States in the heady scientific and exploratory times associated with taming the atom and going to the Moon, ” explains Dr. John Barker. In fact, it was the Apollo Moon-bound missions that inspired the Landsat program. During the early test bed missions for Apollo, photographs of Earth ' s land surface from space were taken for the first time.
