I think the strengths of goalball are the lesson plans. Goalball is one of those sports that you have to play to be very familiar with so having those sample lesson plans would be a great tool. A weakness with goalball is that not many kids can play at one time (of course you can adapt this) and it would be a slow process to teach the basics even.

Games, in the right environment and with the right guidance from teachers, offer students opportunities to grow as independent problem solvers, decision makers, and team players. In addition, students can learn a host of other skills, strategies, and concepts that can transfer not only to other games but also to other life situations. Playing Fair shows teachers how to create the learning environments typical of the Teaching Games for Understanding (TGfU) approach. This text takes the TGfU approach to a new level, incorporating the development of group processes and democratic behaviors that promote personal growth as well as the ability to thrive in group situations. Antisocial behavior and bullying are ongoing problems in schools today. The concepts and practical ideas for lessons offered in Playing Fair address those problems proactively as students learn about conflict resolution, inclusion, democratic decision making, leadership, and bullying. The topics in this book come together in developing the cognitive, psychomotor, and affective domains, all primary goals of the physical education curriculum. A Peek Inside Playing Fair Playing Fair offers teachers these benefits: [] Practical classroom stories showing teachers how they can apply theory and learning situations to their own students and school context [] Activities that include modifications so teachers can apply the games with students of all developmental levels [] Learning checks consisting of questions for teachers to ask their students in order to assess their learning [] Key Concepts, a special element that calls out important concepts for readers The first part of the book covers the process of inventing games and the democratic principles involved, how social justice can be taught and learned through games, understanding the TGfU classification system, curriculum design, and pedagogical principles. The remaining 10 chapters show how to implement the concepts presented in the earlier chapters. Readers learn how to invent and play a variety of games: target games, striking games, net/wall games, and invasion games. What Your Students Will Gain Implementing the principles advocated in this book will help learners in these ways: [] Better understand and appreciate the constructs of game play through external and internalized schemas [] Transfer concepts, strategies, tactics, and skills within and among game categories [] Improve their performance and become more engaged in their own learning [] Become more self-effective and empowered as they understand and value the processes of decision making [] Understand how democracy works from the bottom up [] Grasp that democracy is tenuous, that it breaks down in the absence of active social justice, and that we all have a role and responsibility in constructing and reconstructing it, moment by moment Playing Fair will help students gain a better understanding of themselves and others, and it will make them sensitive to issues such as social justice, collaboration, negotiation, inclusiveness, and fairness. Students will learn to make informed decisions in the context of their invented games and to make intentional, reasoned inquiries about game situations, which they can then transfer to other areas of their lives. Bringing Systemic Change and Facilitating Personal Growth This book will help teachers and coaches teach the principles of game play and those of democracy and citizenship in concrete ways. They will contribute to systemic change in the school culture—a culture in which students learn to create their own games and gamelike situations wherein concepts, skills, and strategies can be learned in context through a process called democracy in action. The bottom line is simple. Playing Fair brings out inherent qualities that have been part of games since the beginning of humankind: play, fun, challenge, inventiveness, teamwork, friendship, and quick thinking. Along the way, games offer opportunities for moral and spiritual development—and the games in Playing Fair offer all that and more.

Student-Centered Physical Education presents over 100 fun physical activities that not only promote student fitness and skill development but also build the foundation for a physically active life. The authors' modular approach allows teachers to mix and match activities in order to achieve specific goals, creating multiple opportunities within each class period for students to succeed. Authors Timothy Smith and Nicholas Cestaro, who together have more than 50 years of teaching experience, have developed a student-centered approach to physical education to replace the outdated, subject-driven approach. By focusing on the needs of the preadolescent student rather than on sports or calisthenics, this proven program challenges exclusivity, boredom, and gender bias. Their strategies and activities make physical education relevant to your students and motivate them to participate in physical activity, both in the gym and after school. Part I, "A Student-Centered Modular Approach," helps you develop and organize your classes. You'll learn how to assemble modular lesson plans and how to increase their effectiveness using the teaching strategies presented. You'll also find a chapter on authentic assessment, which discusses the use of rubrics, portfolios, and portfolio cards. Next, Part II, "Teaching Modules," provides you with easy-to-follow, step-by-step directions for more than 100 fitness-related activities, including -warm-ups, -skill development activities, -team-oriented activities, and -individual and paired activities. Each activity is ready to be inserted into the modular lesson format presented in Part I. In addition, you'll find 10 detailed health-fitness modules-one for each month of the school year-that will help you present and reinforce key lifestyle concepts in addition to the "physical" components of physical education.
