Sacred Egoism (Modern Man in Search of a Soul) The modern man, moreover, is not eager to know in what way he can imitate Christ, but in what way he can live his own individual life, however meagre and uninteresting it may be. It is because every form of imitation seems to him deadening and sterile that he rebels against the force of tradition that would hold him to well-trodden ways.

Experience George Carlin as you've never seen him in this collection highlighting his greatest hits and achievements, including never-before-seen material. It is impossible to talk about 20th century comedy without discussing George Carlin. Named the 2nd greatest standup of the 20th century by both Comedy Central and Rolling Stone, Carlin garnered multiple gold records, 4 Grammys, 6 Emmy nominations, and the Mark Twain Prize for American Humor. He was the first host of SNL, appeared on the Tonight Show some 130 times, and acted in beloved films like Bill and Ted's Excellent Adventure and Dogma. Dubbed "the dean of counterculture comedians," George Carlin was an American icon. A perfect introduction for new fans and a worthy addition to the collections of old fans, The Best of Carlin showcases the longevity, range, and—above all—hilarity of the master. Filled with thoughts, musings, questions, lists, beliefs, curiosities, monologues, assertions, assumptions, and other delicious verbal ordeals, it is drop-dead funny tour through Carlin's mind. More than ten years after his death, Carlin's characteristically ironic takes on life's annoying universal truths remain thoughtful, fearless, and somehow more relevant than ever.

Written three years before his death, The Undiscovered Self combines acuity with concision in masterly fashion and is Jung at his very best. Offering clear and crisp insights into some of his major theories, such as the duality of human nature, the unconscious, human instinct and spirituality, Jung warns against the threats of totalitarianism and political and social propaganda to the free-thinking individual. As timely now as when it was first written, Jung's vision is a salutary reminder of why we should not become passive members of the herd. With a new foreword by Sonu Shamdasani.

Man's selfish pursuit of happiness in the world today is doomed to failure. This is the book of the modern beast.

Though he was a prolific writer and an original thinker of vast erudition, Jung lacked a gift for clear exposition and his ideas are less widely appreciated than they deserve. In this concise introduction, Anthony Stevens explains clearly the basic concepts of Jungian psychology: the collective unconscious, complex, archetype, shadow, persona, anima, animus, and the individuation of the Self. He examines Jung's views on such disparate subjects as myth, religion, alchemy, 'synchronicity', and the psychology of gender differences, and he devotes separate chapters to the stages of life, Jung's theory of psychological types, the interpretation of dreams, the practice of Jungian analysis, and to the unjust allegation that Jung was a Nazi sympathizer. Finally, he argues that Jung's visionary powers and profound spirituality have helped many to find an alternative set of values to the arid materialism prevailing in Western society. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

In this compact volume, British psychiatrist and writer Anthony Storr has selected extracts from Jung's writings that pinpoint his many original contributions and relate the development of his thought to his biography. Storr's explanatory notes and introduction show the progress and coherence of Jung's ideas. These notes link the extracts, and with Dr. Storr's introduction, they show the progress and coherence of Jung's ideas, including such concepts as the collective unconscious, the archetypes, introversion and extroversion, individuation, and Jung's view of integration as the goal of the development of the personality. Jung maintained that we are profoundly ignorant of ourselves and that our most pressing task is to deflect our gaze away from the external world and toward the study of our own nature. In a world torn by conflict and threatened by annihilation, his message has an urgent relevance for every thoughtful person.
