OpenEMR Acknowledgments Page Greater than 60 developers over the last 10 years have directly contributed code to this project. Meaningful Use Certification itself involved numerous individuals, companies and the OEMR organization. Detailed acknowledgments for this monumental feat can be found on the first post in this sourceforge forum.

OpenEMR 4.1 Users Guide - OpenEMR Project Wiki

Uploading Documents Select 'Documents' at the top of the patient Summary page. Here you may upload files that you have scanned and/or saved, such as a patient's ID or insurance card. First, click the appropriate Document Category for the file you wish to upload, then click 'Browse'.

OpenEMR Users Guide

Success of this project is driven by proper documentation of the OpenEMR codebase. 1. All new code requires proper documenting as outlined on the How to Document Your Code Properlywiki page. 2.

OpenEMR API - OpenEMR Project Wiki

and read the included documentation and online documentation at www.openemr.org. Many forms exist in contrib/forms as well as in interface/forms and may be used: as examples. Other configuration settings are stored under includes/config.php. Everything should work out of the installation without touching those, but if:

OpenEMR REST API Documentation Overview. Easy-to-use JSON-based REST API for OpenEMR. All code is done in classes and separate from the view to help with codebase modernization efforts. FHIR is also supported, see [FHIR API documentation here](#). Implementation. REST API endpoints are defined in the primary routes file. The routes file maps an external, addressable endpoint to the OpenEMR controller which handles the request, and also handles the JSON data conversions.
