Microsoft Word Integration with SAP Ariba - SAP Help Portal

SAP Ariba solutions are integrated with Microsoft Word, which enables users to seamlessly edit Word documents in projects. When Desktop File Synchronization (DFS) is enabled and a user opens a Word document in a project, SAP Ariba invokes Word on the user's system and loads the document for the user. If the user does not have the most recent version of the document, SAP Ariba automatically downloads it to the user's local system.

For users who copy and paste from a formatted document, such as an Excel spreadsheet or a table in Microsoft Word, the text may display normally within the MS Word editor in SAPgui, but when the document is displayed in Atlas or by an SAPgui user with the Text-based editor, special characters may be displayed. Switch to the Text-based editor, either temporarily or permanently.

SAPgui Long Text Editor - Using MS Word editor or Text ...

In the daily document handling, most companies and organisations use the Microsoft Office suite of applications (Excel, PowerPoint, Outlook, Word) along with SAP for document management. Thus, an integration of MS Office with SAP and vice versa is necessary. Word is usually used as a standard for the filling of templates in SAP but only in unidirectional fashion — from SAP to MS Office.
